Optimise Trace Elements

Optimise trace element application by incorporating them as fine-ground additives within Optimise. Trace elements are generally applied at very low rates, incorporating them in Optimise provides an ideal means of achieving an even distribution. Trace elements that can be incorporated into Optimise include: Boron, Cobalt Sulphate, Copper Sulphate, Iron Sulphate, Manganese Sulphate, Selenium, Zinc Sulphate. POA.

These are base prices for bulk product supplied ex-manufacturing plant. An additional fee applies if product is bulk bagged. Through-store surcharges apply for any product purchased from consignment stores. Organic certified blends are available, but may attract a small premium - POA.
